## **Industry Gas Producer First to Adopt Wescorp Energy's Gas Management NAVIGATOR Solution**

### ***Comprehensive Operations & Maintenance Management Program Installed by Canadian Company to Enhance Gas Field Operations***

HOUSTON, Texas and CALGARY, Alberta (Thursday, January 31, 2008) – Wescorp Energy Inc. (OTCBB: WSCE), an oil and gas technology solutions provider, announced today that a natural gas production company based in Canada has adopted Wescorp's NAVIGATOR Gas Management Solution. Wescorp's wholly-owned Flowstar Technologies Gas Metering System is being used in conjunction with the NAVIGATOR package to provide a complete end-to-end gas management solution. The customer uses this solution to enhance its processes, accurately measure gas flow, optimize field performance and, in doing so, to reduce operating costs while saving valuable time and resources. The customer purchased the solution and has fully implemented it following a short implementation period.

"Our proprietary operations & maintenance (O&M) Gas Management Solution is a field engineering and process management program that bridges the energy industry's manpower shortage while serving its need for enhanced processes and accurate information for field operations," commented Dr. Scott Shemwell, Wescorp's Chief Operating Officer. "Our solution is made possible by Wescorp's NAVIGATOR, a tailored technological solution that allows customers to reduce operating costs while enhancing field operations. NAVIGATOR enables the customer to organize, manage, consolidate and interpret vital data inputs, thus providing corrective solutions and preventing what otherwise would be inefficiencies within their operations. When using our Solution, the gas producer is better able to concentrate on their core business--drilling, producing and transporting natural gas."

"Our engineering team met with the client and identified specific field challenges and complexities they face," continued Dr. Shemwell. "Then we tailored the solution to meet their specific requirements based on best field practices and our years of field operations expertise. Immediately upon start-up, there was a significant reduction in operational costs and inefficiencies for the customer."

Wescorp's Navigator-based solutions are customized to meet the specific needs of each customer. There have been test installations of various portions of the system completed in both Canada and the USA since the launch of the Solution in the fourth quarter 2007.

## **About Wescorp**

Wescorp Energy Inc. ([www.wescorpenergy.com](http://www.wescorpenergy.com)) is an oil and gas operations solutions provider that uses new patented and proprietary technology, and focuses on commercializing technologies that overcome tough operations challenges facing oil and gas operators today. Wescorp combines its intellectual capital, oil and gas industry experience, best practices methodologies and its market offerings to deliver these solutions in a timely, economic and environmentally friendly manner.

Wescorp shares currently trade on the NASD.OTC Bulletin Board under the symbol "WSCE".
